Year 2-25 power degradation

0~+5W positive power tolerance
peak power output ensures the reliability of the module

Effectively reduces the loss of up to 2%
caused by mismatch and maximizes the output power of the system.

The module shows excellent weak light performance in the morning, evening and cloudy days.

Improved cell technology and selected materials make the module has good PID resistance

The module can withstand wind load of up to 2400Pa and snow load of 5400Pa
